

Educational Objectives

***Department of Chemical Engineering
Montana State University - Bozeman***

The educational objectives of the Department as developed by the faculty with student/industrial input are:

- Graduates of the Department of Chemical Engineering will be well prepared to pursue successful professional careers, either in direct practice or following post-graduate education, based on a broad education grounded in chemical engineering fundamentals.
- Graduates of the Department of Chemical Engineering will be effective team contributors, communicators, and capable of independent learning.
- Graduates of the Department of Chemical Engineering, with specialization in a focus area (bioengineering, materials, chemical engineering, or environmental engineering), will be well prepared through coursework and/or research opportunities to contribute in their focus area professionally.
- Graduates of the Department of Chemical Engineering, with internship/cooperative education experience, will quickly contribute professionally.
