

Jeffrey J. Heys

Experience

Montana State University, Chemical and Biological Engineering

July 2012 to present

Associate Professor and Department Head

Responsible for guiding a rapidly growing Chemical and Biological Engineering Department from approximately 300 students to 600 students and faculty growth from 9 tenure track faculty to 13 tenure track faculty and 1 non-tenure track faculty.

Montana State University, Chemical and Biological Engineering

Aug 2008 to 2012

Assistant Professor

Advisor for the Computational Biofluid Dynamics research group that focuses on numerical models of biomimetic micro-flow sensors, weighted least-squares finite-element methods for analysis of PIV data from the left ventricle, biofilm mechanics models, and particle deposition in the human airways.

Arizona State University, Chemical and Materials Engineering

Aug 2004 to Aug 2008

Assistant Professor

Established a research group focused on developing advanced mathematical models and numerical analysis to a variety of biological problems including fluid-tissue interaction, porous flow through heterogeneous tissues, inhaled particle deposition, drug delivery, and fluid-hair interaction.

University of Colorado, Department of Applied Mathematics

June 2001 to Aug 2004

VIGRE Postdoctoral Fellow

Conducted research on advanced numerical techniques for solving mechanically coupled systems that include a moving fluid and a deformable tissue. Applications include the modeling of blood flow in vessels following a Fontane procedure, and modeling of aqueous humor interaction with the iris.

- Utilized an algebraic multigrid (AMG) algorithm to solve the linear equation system resulting from a finite element discretization.
- Created an original parallel (MPI) software package to solve differential equations with FOSLS.

University of Colorado, Department of Chemical Engineering

August 1996 to May 2001

Graduate Research Assistant

Research focused in the areas of biomechanics and finite element modeling of biological transport.

- Developed finite element models of the anterior eye that are capable of describing the complex coupling between the circulating fluid and the elastic tissues in the eye.

Completed the following laboratory rotations as part of the Biotechnology program:

- "Transdermal Photopolymerizations" with Prof. Kristi Anseth
- "Isoprene Production during *Bacillus* Fermentation" with Prof. Ray Fall

NeXStar Pharmaceuticals, Inc.

June 1998 to August 1998

Biotechnology Internship

Conducted experiments on the scale-up of a new RNA synthesis technique and developed techniques for measurement of modified RNA solubility.

Extensive use of the following experimental techniques:

- HPLC including Ion exchange chromatography and size exclusion chromatography
- NMR, Spectrophotometry, Mass Spectrometry

Stone Container Corp.

May 1995 to September 1995

Intern

Assisted the Process Control Engineer in updating and improving the process control system at a major pulp and paper mill.

- Developed novel software to enable remote communication between the process control computers and a PC.

Worked in the Environmental Engineering Department on monitoring air emissions and compliance reporting.

- Prepared MSDS reports for new chemicals produced within the plant.
- Prepared daily air emission reports and reported violations to the state government.

Education

University of Colorado at Boulder

Doctor of Philosophy Degree in Chemical Engineering

May, 2001

Thesis advisor: Prof. Victor H. Barocas

Thesis title: "An Elastohydrodynamic Model of the Anterior Eye with Application to the Pigmentary Glaucoma"

Master of Science Degree in Chemical Engineering

May, 1998

Thesis advisor: Prof. Victor H. Barocas

Thesis title: "Mathematical Modeling of Fluid Dynamics in the Eye"

Received a Graduate Interdisciplinary Certificate in Biotechnology

Montana State University

Bachelor of Science Degree in Chemical Engineering

May, 1996

Completed a senior thesis entitled, "Distinguishing Between 6-Carbon Sugars on Surfaces Using Time-of-Flight Secondary Ion Mass Spectroscopy and X-Ray Photoelectron Spectroscopy"

Machine Learning

January, 2016

Certificate of Completion from Coursera

Awards

Award for Excellence

2016

Montana State University Alumni Foundation

Distinguished Professor of Chemical Engineering

2008

Arizona State University

Outstanding Teaching Award

2008

Ira A Fulton School of Engineering

Outstanding Teaching Award

2007

Ira A Fulton School of Engineering

First place in the Bio-modeling poster session at the

2001

ASME/AICHE Summer Bioengineering Conference

First place in the Ph.D. student poster competition

1999

ASME/AICHE Summer Bioengineering Conference

Beverly Sears Dean's Small Grant Award

1999

"Biomechanical Characterization of the Iris"

Dean's Travel Grant

1999

NIH Biotechnology Traineeship

1998 and 1999

31. **J.J. Heys** and V.H. Barocas, "Mathematical Modeling of Fluid Mechanics in the Eye." Eleventh Annual Colorado Biotechnology Symposium, Fort Collins, CO. September 1998
32. **J.J. Heys** and V.H. Barocas, "Mathematical Modeling of Fluid Mechanics in the Eye." AAAS Southwestern and Rocky Mountain Division Meeting, Grand Junction, CO. May 1998

Student Theses and Dissertations Supervised

Current Graduate Projects in Progress

Akar, Burak, Optimization of nanoparticle kinetics for ionizing radiation dose measurement, MS expected 2017, PhD expected 2020

Ray, Lori, project on biological systems modeling initiating summer of 2016, PhD expected in 2018 or 2019

Former Graduate Students

Rajaraman, Prathish Project on data assimilation using Least-Squares Finite Element Methods, PhD 2016; Project on stabilized finite elements for particle deposition simulation in the human airways, MS 2012

Salinas, Daniel Project on noise in microbial dynamical systems models and metabolic network analysis, MS 2013

Vo, Garrett Project on comparison of continuous and discontinuous Galerkin methods for parabolic PDEs, MS 2012

Wei, Fei Project on computational fluid dynamics with PIV data assimilation using least-squares finite element methods, MS 2011

Gordon, Eric Project on immersed boundary simulation of the cricket sensory system and micro-flow sensors, MS 2011

Merchant, Bradley Project on flow through the trabecular meshwork, MS 2007

Wininger, Clinton Project on particle deposition in the human airways, MS 2008

Undergraduate Research Supervised

Vanaclocha-Saiz, Maria, Finite Element Analysis of Sacroiliac Prosthetic, BS Thesis, 2016

Christopher, Wiley, Optimization of heat shock inhibition, 2015

Mushaben, Madaline, Effects of reaction kinetics in laser tissue welding, 2015

Venters, Michael, Spatial segregation and diffusivity in microbial communities, 2015

Selenis, Rachel, Effects of segregation on microbial consortia growth, 2015

Akar, Burak, Simulation of gold nanoparticle synthesis, 2014

Vigers, Michael, Optimized laser tissue welding algorithm, 2014

Tosun, Kubra, Implemented a model of laser tissue welding in FEniCS, 2013

Gosney, Joshua, Developed a model of drag on attached microbubbles, 2013-2014

Vadheim, Bryan, Research on biofilm detachment models, 2011

Aisenbrey, Elizabeth, Development of edge detection algorithms for airway MRI, 2010-2011

Williamson, Nathan, Research on high-order particle deposition modeling, 2010

Johnson, Jason, Research on hyperthermal cancer treatment with GNRs, 2009-2010

Hu, James, Undergraduate researcher on hyperthermal cancer treatment with GNRs, 2009-2010

Zeller Schmid, Undergraduate researcher on Viscoelastic Models of Cricket Flow Sensor, 2008-2009

Travis Harrer, Undergraduate researcher on Immersed Particle Method for Biofilms, 2009

Nicole Holyoak, Undergraduate Scholars Program, Flow Through the Aortic Valve, 2008-2009

Garret Vo, Undergraduate researcher on Immersed Boundary Methods for Biofilms, 2008-2009

Sorensen, Kimberly Undergraduate researcher on Flow Through the Aortic Valve, 2008

Lenzi, Jacob Undergraduate researcher on Analysis of PIV data in the Left Ventricle, 2008

Kubinski, Susan Fulton Undergraduate Researcher on Car Propulsion, 2007-2008

Jasper-Duruzor, Afam Undergraduate researcher on Analysis of PIV data in the Left Ventricle, 2007

Knott, Brandon Fulton Undergraduate Researcher on Least-squares finite element methods, 2006

Gemmel, Joshua Undergraduate researcher on mesh generation of bifurcating geometries, 2006

Abell, Benjamin Undergraduate researcher on finite elements with distributed computers, 2004

Nolting, Josh VIGRE undergraduate researcher. 2002-2003.

Ramirez, Pete Independent Study, Spring, 2000.

Garcia, Janet SMART summer intern program, 1999. Final report: "Building the Square Eye."

Martien, Leslie Employed as an hourly student research assistant in 1999

McCormick, Dan Employed as an hourly student research assistant in 1998-1999.

Koch, Nathan Employed as an hourly student research assistant in 1997-1998.

Frazier, Christine E. SMART summer student, 1997. Final report: "Biomechanics of the Bovine Eye."

Postdoctoral Research Supervised

Harvey, Emily, Analyzed models of microbial consortia, 2012-2013

Cummins, Graham, Analyzed the impact of RNA production on feedback networks, 2011

Graduate Student Committees (past 4 years)

Diana Schepens, member, Mathematics

Barkan Sidar, member, Chemical Engineering

Neerja Zambare, member, Chemical Engineering

Ashley Beck, member, Microbiology

Reed Taffs, member, Chemical Engineering

Daniel Kanewske, member, Mathematics

Kristopher Hunt, member, Chemical Engineering

Mehmet Kiris, member, Chemical Engineering

EBIO 411: Biological Engineering Design	Fall, 2016	18	3.6/4.0	3.5/4.0
EBIO 412: Biological Engineering Design 2	Spring, 2017	17		
EGEN 102: Engineering Computations	Spring, 2017	165		

Other Courses Taught

- Numerical Analysis I, Fall, 2003 and Numerical Analysis II, Spring, 2004 - 40 students.
- Scientific Computing, Spring 2002. Taught within a computer lab setting - 13 students.
- Calculus for Engineers I, Fall, 2001; Fall, 2002; Spring, 2003; 75-150 students.

Professional and Scientific Service

Scientific and Professional Society Memberships

American Institute of Chemical Engineers – member
Biomedical Engineering Society – member
American Society of Engineering Education – member
American Association for the Advancement Science - member

Conference Activities

Session Chair: 85th Annual Pacific Northwest ASEE Conference, Boise, ID, April, 2016
Session Chair: 4th International Congress on Computational Engineering and Sciences, Las Vegas, NV, May, 2013
Session Chair: Advances in Numerical Methods for Transport Phenomena, AIChE Annual Meeting, October, 2012
Session Chair: Focus on Capstone Experiences in the Chemical Engineering Curriculum, ASEE Annual Meeting, June, 2011
Session Chair: Mathematical and Computational Biosystems Engineering I and II, AIChE National Meeting, November, 2008
Session Chair: Applied Mathematics in Energy and the Environment, AIChE National Meeting, November, 2008
Session Chair: Advances in Computational Methods and Numerical Analysis Session, AIChE National Meeting, November, 2007
Session Chair: FOSLS Methods, Copper Mountain Iterative Methods Conference, March, 2006
Submission Reviewer: Summer Bioengineering Conference, 2010, 2011
Student Poster Competition Judge, AIChE National Meeting, 2008, 2011
